## 500 - 1500 Pound PTO Driven Spreader

Efficiently broadcasts as little as 50 lbs per acre on to fields and pasture. Moderate price when new but discounted at auctions. This is the most efficient PTO driven spreader for small farms. 1300 lbs will cover 26 acres.

Product description: LELY Model L 1250

- Mounted by 3 -point hitch / PTO driven, Class I or II
- Hopper material capacity of 1,323 lbs (625 kgs)
- Can handle bulk bagged fertilizers

A pivoting hopper makes changing the feed-ring quick and easy. Spreading system spreading pattern adjustment plate, with section indication, provides a variety of settings, ensuring simple operation.

**Dynamic design:** Six dynamically designed spoons direct a metered quantity of material to the field ensuring a constant and precise material feed from the disc to the spoons.

**Easy to clean:** All Lely broadcast spreaders have hoppers that can be removed or tilted up by one or two latches, making for easy and quick cleaning of the critical feed-ring assembly area and ejector disk, ensuring a long life for spreaders. The spreading pattern adjustment plate, with section indication, provides a variety of settings, ensuring simple operation.
